(54) AUTOMATICALLY PROGRAM RECEIVING AND STARTING DEVICE

(57)Abstract:

PURPOSE: To remarkably simplify the program reservation means by applying a prescribed color in a frame of the program content provided in the program list and reserving/cancelling the program depending on the content of the color information.

CONSTITUTION: The user desiring program reservation reads a program list A at first and applies a prescribed color (e.g., blue) to the entire frame 10 of the program content desired to be reserved. When the color application is finished to all the desired reservation program, the program list A is inputted to a color image reader 1 and outputted to a program information generating circuit 2 as an output signal (a). The circuit 2 uses the output signal (a) to generate program information (b) to specify the program. The program information (b) consists of the broadcast time, the channel number and kinds of the program, they are stored in the memory circuit 3 and the reservation of the program is finished by the end of storage.
